

# Vivalto RZ

## Cherry Tomato Cocktail

 **Rugose**  
**DEFENSE**  
Healthy Produce, Peace of Mind

### **The Mediterranean cocktail tomato**

Nice deep red colour with a good and uniform fruit size during the whole cycle. The truss shape is also very nice and uniform. It has an excellent shelflife. The plant has a good vigor and is adapted to long cycles in Autumn/Winter conditions, but also to Spring/Summer cycles.

Sharing  
a healthy  
future

Indications: All these indications are the result of repeated tests both at our experimentation centres and with farmers themselves, and may differ from the above depending on the zones and climate conditions, or if the right cultural practices are not observed. Rijk Zwaan has carefully written the text in this brochure. However, as it is a general guide, parameters such as the specific climate conditions of each area should be taken into account in its application. The images used are intended to provide a general idea of the product type, but this may differ depending on the farming techniques, management and cultural practices applied to the product. None of the indications expressed on individual data sheets will be valid without taking these general considerations into account. Therefore, in no case is Rijk Zwaan responsible for the results which derive from its implementation, as this process includes many factors external to the brochure content, such as the aforementioned climate conditions or the different agricultural techniques of each farmer. In any case, if the user has any doubts about the influence of local conditions on the development of a variety, Rijk Zwaan recommends carrying out a small-scale trial production. Reproduction and total or partial modification in any form or system is prohibited, without the explicit written consent of Rijk Zwaan Ibérica S.A.

Definition of terms describing the reaction of plants to pests, diseases and abiotic stresses for the horticultural seed industry (approved by the ISF Horticultural and Ornamental Section in May 2005): See www.rijkwaaan.es and at www.worldseed.org.
